REQUEST FOR PROPOSAL (RFP)

ARCHITECTURAL MASTER PLANNING, DESIGN AND ENGINEERING SERVICES

VISION HEALTH CARE FOUNDATION (VHCF)

Secondary Eye Care & Community Eye Health Centres
Attock and Chakki–Pindigheb, Punjab, Pakistan

1. INTRODUCTION

Vision Health Care Foundation (VHCF) is a charitable, not-for-profit healthcare organisation committed to improving access to quality eye care and disability-inclusive community services in Pakistan.

As part of its Strategic Plan 2026–2030, VHCF intends to establish a model Secondary Eye Care Centre in Attock, Punjab, designed as a high-quality, efficient, patient-centred eye health facility integrated with community outreach, school health, disability inclusion, and digital health systems.

The proposed design shall also serve as the prototype for a future replication at Chakki–Pindigheb and potentially other locations.

VHCF therefore invites proposals from qualified architectural and engineering firms with demonstrated experience in healthcare design to provide comprehensive planning and design services.

2. PROJECT VISION

The facility shall embody the following principles:

• Patient-centred design
• High-quality secondary eye care delivery
• Universal accessibility
• Disability-inclusive infrastructure
• Infection prevention and control
• Operational efficiency
• Environmental sustainability
• Future scalability
• Digital health readiness
• Replicability across multiple sites

The facility should become a recognisable architectural identity for VHCF's future network of eye care centres.

3. PROJECT OBJECTIVES

The architect shall design a facility capable of delivering:

A. Clinical Eye Care Services

• General Ophthalmology
• Optometry & Refraction
• Optical Dispensing
• Cataract Services
• Glaucoma Services
• Medical Retina Services
• Diabetic Eye Care
• Low Vision Services
• Minor Procedures
• Secondary-level Diagnostic Services

B. Community and Public Health Functions

• School Health Programme Operations
• Community Outreach Coordination
• Disability Assessment and Referral
• Telehealth Services
• Vision Awareness Device (VAD) Operations
• Community Education Activities

C. Training Functions

• Optometry Internship Programme
• Continuing Professional Development
• Clinical Skills Training
• Community Health Worker Training

4. DESIGN PHILOSOPHY

The design shall:

• Create a healing and welcoming environment.
• Minimise patient movement and waiting times.
• Separate clean and contaminated flows.
• Facilitate efficient staff supervision.
• Support future service expansion.
• Maximise natural light and ventilation.
• Integrate landscape and therapeutic outdoor spaces.
• Reflect local culture while maintaining modern healthcare standards.

5. SCOPE OF SERVICES

The selected consultant shall provide:

Phase 1 – Strategic Planning

• Site analysis
• Topographical review

• Climate analysis
• Accessibility review
• Service planning workshops
• Functional programming

Phase 2 – Master Planning

• Site zoning
• Vehicular circulation planning
• Pedestrian circulation planning
• Emergency access planning
• Utility planning
• Landscape planning
• Future expansion planning

Phase 3 – Concept Design

• Concept alternatives
• 3D massing studies
• Visualisations
• Site development concepts

Phase 4 – Detailed Design

• Architectural drawings
• Structural drawings
• Mechanical drawings
• Electrical drawings
• Plumbing drawings
• Fire safety systems
• Medical gas systems (future-ready)
• ICT infrastructure
• Solar energy integration

Phase 5 – Tender Documentation

• Construction drawings
• BOQs
• Technical specifications
• Tender support documentation

6. FUNCTIONAL PROGRAMME

The architect shall develop accommodation schedules for:

Clinical Areas

• Reception and Registration
• Waiting Areas
• Triage

- Examination Rooms
- Refraction Rooms
- Diagnostic Rooms
- Imaging Unit
- Optical Shop
- Procedure Rooms
- Operating Theatre Complex
- Recovery Area
- Pharmacy
- Low Vision Unit

Community Health Areas

- Outreach Department
- School Health Coordination Office
- Telemedicine Hub
- Counselling Rooms
- Health Education Space

Training Areas

- Training Hall
- Demonstration Rooms
- Skills Laboratory
- Library and Digital Learning Space

Administrative Areas

- Executive Offices
- Administration
- HR
- Finance
- Medical Records
- IT Office

Support Services

- Sterilisation Unit
- Stores
- Maintenance Workshop
- Laundry
- Housekeeping
- Staff Facilities
- Security

External Components

- Parking
- Ambulance Bay

• Service Yard
• Healing Garden
• Rehabilitation Garden
• Outdoor Gathering Space

7. REPLICATION REQUIREMENT

A critical requirement of this project is design replication.

The architect shall develop:

• A standardised VHCF Eye Care Centre prototype.
• Modular building blocks.
• Expandable service modules.
• Standard room templates.
• Standard engineering templates.
• Standard signage systems.
• A design manual enabling duplication at Chakki–Pindigheb and future sites.

The design should allow implementation at sites ranging from approximately 1.5 to 5 acres.

8. DIGITAL HEALTH REQUIREMENTS

The facility shall be designed to support:

• OpenEMR-based Electronic Medical Records
• Teleophthalmology
• Digital Imaging
• Networked Diagnostic Equipment
• CCTV and Security Systems
• Smart Building Management Systems
• Future AI-assisted screening tools

9. ACCESSIBILITY REQUIREMENTS

The design shall comply with universal design principles and include:

• Step-free access
• Wheelchair accessibility
• Accessible toilets
• Wayfinding systems
• Low-vision-friendly signage
• Hearing-support provisions
• Inclusive waiting areas

10. SUSTAINABILITY REQUIREMENTS

The architect shall maximise:

• Energy efficiency
• Solar integration
• Rainwater harvesting opportunities
• Water conservation
• Local materials where feasible
• Passive cooling strategies
• Low-maintenance design

11. DELIVERABLES

The consultant shall provide:

• Master Plan
• Functional Programme Report
• Concept Design Report
• Architectural Drawings
• Engineering Drawings
• BIM / 3D Model
• Rendered Visualisations
• Construction Documentation
• Cost Estimates
• Phasing Strategy
• Replication Design Manual

12. CONSULTANT QUALIFICATIONS

Preference will be given to firms with experience in:

• Hospitals
• Eye Hospitals
• Community Health Centres
• Rehabilitation Facilities
• Universal Accessibility Design
• Healthcare Campus Planning
• Modular / Prefabricated Construction

13. EVALUATION CRITERIA

• Relevant Healthcare Experience
• Design Quality
• Technical Capacity
• Understanding of Eye Care Facilities
• Replication Strategy
• Sustainability Approach
• Project Team Credentials
• Cost Competitiveness

14. PROJECT OUTCOME

VHCF seeks not merely a building, but a replicable healthcare model that can serve as the foundation of a future network of disability-inclusive eye care facilities across Pakistan.
